

SUPPLIER SOCIAL COMPLIANCE AUDIT — REPORT

On behalf of Nordkap Apparel AB · against Nordkap Supplier Code of Conduct v6 (2025)

|            |                                                                                   |                         |                                            |
|------------|-----------------------------------------------------------------------------------|-------------------------|--------------------------------------------|
| Facility   | Test Textile Ltd                                                                  | Standard                | Nordkap Supplier Code of Conduct v6 (2025) |
| Address    | Plot 44–46, Sector 3, Karnaphuli EPZ Road, Ashulia, Savar, Dhaka 1341, Bangladesh | Workers on site         | 1,284 (947 female, 337 male)               |
| Audit type | Initial — pre-order, announced                                                    | Workers interviewed     | 38 (28 individual, 2 groups)               |
| Audit date | 2026-08-26                                                                        | Records period reviewed | June – July 2026                           |
| Auditor    | S. Chowdhury, lead · badge VA-BD-0918                                             | Overall rating          | C — conditional, re-audit in 90 days       |

| Critical | Major | Minor | Observation | Total |
|----------|-------|-------|-------------|-------|
| 1        | 3     | 3     | 1           | 8     |

A critical finding suspends new order placement until it is closed and verified. Nordkap Apparel AB has placed NKA-PO-70318 conditionally on the fire-exit finding being closed within 14 days with photographic evidence.

Findings

| # | Severity                  | Finding                                                                                                                                                                                                    | Ref |
|---|---------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1 | Critical (zero tolerance) | Two of the four fire exits on the 3rd floor sewing area were obstructed by stacked carton pallets at the time of the walk; exit 3B was locked and the key was held in the security office.                 | p.4 |
| 2 | Major                     | Overtime records for June and July 2026 show 68 operators exceeding the statutory 2 hours per day on 9 and 11 days respectively, without the written consent required by the Bangladesh Labour Rules 2015. | p.5 |
| 3 | Major                     | Chemical store for spot-cleaning solvents has no secondary containment and no MSDS displayed in Bangla; three containers were unlabelled.                                                                  | p.5 |
| 4 | Major                     | No functioning anti-harassment committee could be evidenced; the last recorded meeting minute is dated 2025-11-04.                                                                                         | p.6 |
| 5 | Minor                     | Drinking-water points on the ground floor were tested at 1 point per 84 workers against the required 1 per 50.                                                                                             | p.6 |
| 6 | Minor                     | Personal protective equipment for the cutting section (metal mesh gloves) was available but not worn by 4 of 11 cutters observed.                                                                          | p.7 |
| 7 | Minor                     | Machine guards were missing on 2 of 14 button-attach machines inspected.                                                                                                                                   | p.7 |
| 8 | Observation               | Childcare room is operating above its registered capacity on morning shifts; the factory has applied for an extension.                                                                                     | p.8 |

Corrective action plan

| # | Action required                                                                                                     | Due        | Owner       |
|---|---------------------------------------------------------------------------------------------------------------------|------------|-------------|
| 1 | Clear and unlock all fire exits; move carton staging out of the egress path; keys removed from the security office. | 2026-09-02 | Compliance  |
| 2 | Obtain and file written overtime consent; cap daily OT at 2 hours in the attendance system.                         | 2026-09-30 | HR          |
| 3 | Install bunded storage and display Bangla MSDS; label all containers.                                               | 2026-09-30 | Compliance  |
| 4 | Re-constitute the anti-harassment committee and minute monthly meetings.                                            | 2026-10-15 | HR          |
| 5 | Add drinking-water points to reach 1 per 50 workers.                                                                | 2026-10-15 | Admin       |
| 6 | Re-train cutters on PPE; daily supervisor check.                                                                    | 2026-09-15 | Quality     |
| 7 | Fit guards to all button-attach machines.                                                                           | 2026-09-15 | Maintenance |
